

Anytime a local health department brings in a new Health Commissioner, you can expect some challenges. And doing so in the midst of a pandemic can easily create a whirlwind of issues, and that is why I cannot speak highly enough of not only the staff at the Logan County Health District, but the numerous community partners we work with. Our staff has done a tremendous job adjusting to new leadership along with the ever-changing COVID-19 landscape. 2021 saw our staff continue with increased duties due to COVID-19, including case investigation, contact tracing, grant management, distributing thousands of COVID-19 test kits, and providing vaccines. We have continued to work with numerous partners throughout the pandemic, including schools, daycares, long-term care facilities to name a few, and provided the latest, science-based guidance on how to keep the community safe and healthy.

This has been a tremendous undertaking, and while this will continue in 2022, our agency does much more than just work in COVID-19. Exciting projects in 2022 include our environmental health staff continuing to roll out our Operation and Maintenance program to ensure septic systems across the county are working properly, our newly hired health educator providing a multitude of programming for our community, and our newly hired epidemiologist keeping track of the latest disease trends and prevention strategies.

Lastly, I want to thank our volunteers for all their time and efforts throughout the pandemic. To put it simply, there is no way we could have managed all our COVID-19 activities without our dedicated volunteers being so willing to assist us. With their help, we were able to champion a safe and healthy community in 2021.

Take care,  
Travis Irvan, MPH  
Health Commissioner

## Nursing Division

There are over 100 communicable and reportable diseases that are followed at the local level for the Ohio Department of Health. Logan County Health District **investigates** an average of **250-300 cases per year** and has seen an increase in the total number of cases over the past 5 years. **2021 saw over 5,500\* cases** investigated due to the pandemic.

### Top 5 reportable diseases for Logan County in 2021 after COVID-19

114 cases - Chlamydia infection  
35 cases - Hepatitis C  
27 cases - Gonococcal infection  
8 cases - Campylobacter  
7 cases - Syphilis

\*COVID-19 was responsible for 96% of Logan County reportable diseases\*

During , the Logan County Health District was able to continue the **Newborn home visiting program** and the **Children with Medical Handicaps (CMH) program** virtually.

## Women, Infants and Children (WIC)

The Logan County WIC office moved to a new location! WIC is now located at 1 Hunter Place in Bellefontaine, sharing a building with the Department of Job and Family Services and have acclimated well. This helps to provide a one-stop-shop for those needing both services.

Current participants can choose to have either an in-person appointment or over the phone due to COVID-19.

Breastfeeding initiation rates for the program are at **79%**.  
Breastfeeding at 1-month post-partum are at **59%**.

"If you are in the income bracket, I also recommend WIC!!! I LOVED my breastfeeding consultant!"

**Did you know  
you may qualify  
for a free septic  
system?**

From the \$150,000 available from the 2020-2021 Water Pollution Control Loan Fund granted by the Ohio Environmental Protection Agency, \$116,530.91 was spent in Logan County to repair or replace failed septic systems.

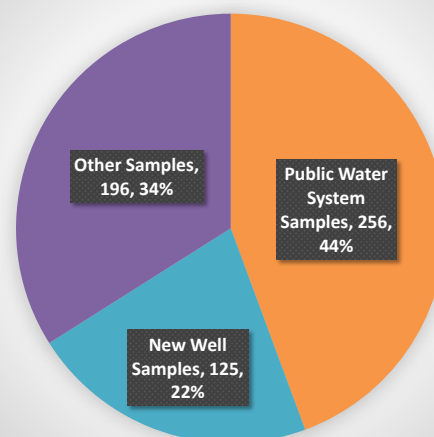

**"I was most pleased to attend the [Board of Health] meeting and thank you for succinctly introducing our well request. I was pleased with the understanding and concern demonstrated by the Logan County Health District Board." - Logan County resident**

**We can test your  
water!**

The Logan County Health District Environmental Division can do private and public well water testing!  
Things that can be tested for:

- Total Coliform/ E.coli
- Lead, Arsenic, Iron, Copper, Nitrate
- Other tests upon request

Water Samples 2021

**"After having a bad experience with a different water sample company, I decided to use the Health Department to test our well. The environmental staff that came was very thorough and professional. Would definitely recommend them for water testing" - Water program customer**

## Fun Fact

**Ember** was the most common name for girls in Logan County in 2021.

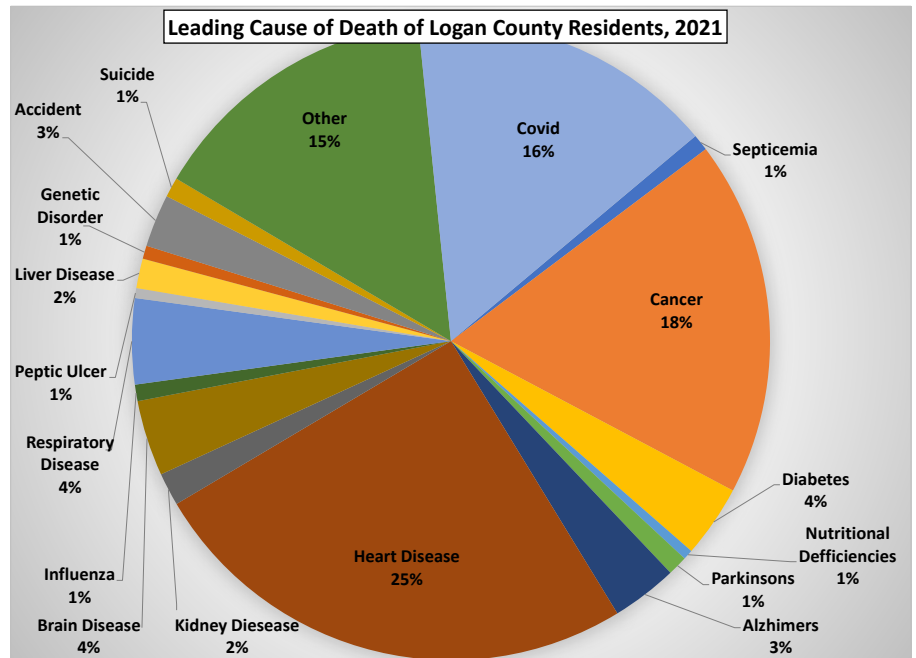

The most common name for Logan County boys was **Leland**.

"I just wanted to give a huge shout out to LCHD! I have been there twice now, and both times I was so incredibly impressed at the efficient way they have vaccinated people against COVID."

- COVID-19 vaccine recipient
